OPSBLOCK

Modular Business Services

Business Model & Service Catalog

Internal Reference Document

Pick the exact blocks your business needs.

Business Model Overview

Opsblock is a modular management and operations company that lets established businesses assemble exactly the services they need—rather than hiring full-time staff or buying all-or-nothing packages. Clients select individual “blocks” (collections, AP, bookkeeping, diagnostic, branding, website, fractional finance, and more) with transparent, value-based pricing.

Core Positioning

- Modular “building blocks” approach — clients pick only what they need
- Value-based pricing (not priced by how easy the work is)
- Primary target: established companies roughly $1M–$20M+ revenue
- Strong entry points: Business Diagnostic and Collections
- Team strengths: accounting/admin + collections expertise, tech/engineering, CPA/CFO
- Simple public menu (8 core blocks); advanced blocks available after engagement

Go-to-Market Approach

Lead with a high-value entry point (diagnostic or collections) rather than the full menu. Use warm introductions, referrals from CPAs/attorneys/bankers, and targeted outreach. Smaller or discounted clients can be used briefly for proof and process refinement, but the model is built for established companies that can support the pricing. Launch pricing for early/smaller clients can be offered as a limited, temporary offer without undercutting the standard rates shown publicly.

Pricing Philosophy

Prices reflect value delivered, not effort or ease of delivery. Ongoing services use monthly retainers with clear volume tiers where relevant. One-time projects (branding, website, diagnostic, custom apps) use fixed ranges. Collections uses a hybrid model (base + success fee). Advanced work is scoped and quoted once the client is engaged.

Core Public Menu — Full Descriptions

These eight blocks form the simple, scannable public offering. Pricing ranges are value-based starting points for established small-to-midsize businesses.

Business Diagnostic

$1,000–$3,000 one-time

A structured review of operations, finance, and systems to identify the biggest holes and cash leaks. Includes a short written summary of findings, a prioritized list of issues, and recommended blocks. Focus is on process bottlenecks, collection gaps, and quick wins. Delivery is typically a call plus a concise report.

Collections

$300–$800/month + 15–25% of recovered amounts

Managed recovery of overdue receivables. Requires documented owner authorization for write-offs and communication. Includes a structured follow-up sequence, aging review, and controlled outreach. Success fee applies only to amounts actually collected. Scope is limited to existing receivables unless expanded.

Accounts Payable

$400–$900/month + volume tiers

Invoice intake, coding, approval routing, payment scheduling, and basic vendor follow-up. Base covers a defined volume (example: up to 50–100 invoices). Extra volume is priced in clear tiers. Does not include full bookkeeping unless added as a separate block.

Bookkeeping

$500–$1,500/month

Transaction categorization, bank and credit-card reconciliations, and standard monthly financial reports (P&L; and balance sheet). Scope is based on transaction volume and number of accounts. Does not include AP/AR management, payroll processing, or tax filing unless those blocks are added.

Virtual Receptionist

$400–$1,200/month

Call answering, basic message taking, scheduling support, and light email or calendar triage within a defined hour range. Coverage is part-time unless a higher tier is chosen. Does not include full virtual assistant or sales work.

Branding Package

$1,500–$4,000 one-time

Logo, slogan, color palette, and a short brand guide. Includes a defined number of revision rounds. Final files are delivered in usable formats. Does not include website build, ongoing marketing, or social media management.

Website

$2,000–$6,000 one-time

Business website (typically 5–10 pages) with standard pages, mobile-friendly design, and basic contact forms. Includes a defined revision cycle and launch. Ongoing hosting, maintenance, or content updates are available separately.

Fractional CFO

$3,000–$8,000/month

Strategic financial oversight, reporting review, cash-flow guidance, and advisory support within a defined hour range. Requires reasonably clean books. Does not include day-to-day bookkeeping or tax preparation unless those blocks are added.

Next-Layer / Advanced Blocks — Full Descriptions

These services sit behind the simple public menu. They are offered once a client has engaged with at least one core block or after a diagnostic. Pricing remains value-based and scoped.

Process & SOP Build

$2,000–$6,000 project (or $800–$2,000/month ongoing)

Document and clean up key workflows. Includes mapping current processes, writing clear standard operating procedures, and a short handoff so the team can follow them. Scope is limited to a defined set of processes (example: order-to-cash, AP, or client onboarding). Does not include full system implementation unless added.

App or Custom Software

$5,000–$25,000+ project (or hourly $125–$175)

Scoped custom app or internal tool. Includes requirements, build, basic testing, and handoff. Price depends on complexity, integrations, and features. Ongoing support or maintenance is a separate retainer if wanted. Not a fixed menu item—quoted after a short discovery.

Automation & System Streamlining

$1,500–$8,000 project (or $1,000–$3,000/month retainer)

Identify and implement practical automations (tools, workflows, or light custom scripts) that remove manual work. Includes a short assessment, recommended changes, and implementation within a defined scope. Goes beyond the basic diagnostic. Complex or multi-system work is quoted separately.

Fractional Controller

$2,000–$5,000/month

Hands-on oversight of the close, reconciliations, internal controls, and reporting. Sits between basic bookkeeping and full CFO advisory. Typically 10–20 hours/month. Requires reasonably organized books. Does not include tax prep or high-level strategy unless those blocks are added.

Fractional Ops / CEO Support

$3,000–$10,000+/month

Higher-level operational guidance, decision support, and light leadership oversight within a defined hour range. Focus is on priorities, process gaps, and execution. Not a full-time executive role. Scope and hours are set upfront so expectations stay clear.

Expanded AR Management

$300–$800/month + volume tiers

Routine invoicing, reminders, aging reports, and light follow-up (separate from hard collections). Base covers a defined volume of invoices. Extra volume is priced in tiers. Does not include the success-fee collections block unless added.

Ongoing Website or Tech Support

$150–$400/month (website) or $1,000–$3,000/month (broader tech)

Post-launch maintenance, small updates, hosting oversight, or light technical support. Website tier covers content tweaks and basic upkeep. Broader tech retainer covers ongoing automation, minor fixes, or system monitoring within a defined hour cap.

Multi-entity or Higher-Complexity Finance

Add 25–50% to the base rate

Extra fee for multiple entities, intercompany work, more complex revenue recognition, or heavier reporting needs. Applied on top of the standard bookkeeping, controller, or CFO pricing rather than a separate menu item. Quoted once the exact complexity is clear.

Pricing Summary — Core Blocks

Service	Pricing
Business Diagnostic	$1,000–$3,000 one-time
Collections	$300–$800/mo + 15–25% success
Accounts Payable	$400–$900/mo + volume
Bookkeeping	$500–$1,500/mo
Virtual Receptionist	$400–$1,200/mo
Branding Package	$1,500–$4,000 one-time
Website	$2,000–$6,000 one-time
Fractional CFO	$3,000–$8,000/mo

Pricing Summary — Advanced Blocks

Service	Pricing
Process & SOP Build	$2,000–$6,000 project
App / Custom Software	$5,000–$25,000+ project
Automation & Streamlining	$1,500–$8,000 project
Fractional Controller	$2,000–$5,000/mo
Fractional Ops / CEO Support	$3,000–$10,000+/mo
Expanded AR Management	$300–$800/mo + volume
Website / Tech Support	$150–$400 or $1,000–$3,000/mo
Multi-entity / Complex Finance	+25–50% to base rate

This document consolidates the Opsblock business model, positioning, core public menu, and next-layer services discussed to date. Pricing ranges are starting points and should be refined based on actual client volume, complexity, and results.
